

JK/JKU FREEDOM SERIES WINCH FAIRLEAD BRACKET #1195-46102

BEFORE YOU BEGIN

Thank you for purchasing this Fly Offroad Winch Fairlead Bracket and joining us in *The Pursuit of Freedom!* Please inspect the package contents upon opening. Ensure it is complete according to the parts list below and that none of the contents are damaged. If there are any discrepancies contact Fly Offroad at info@flyoffroad.com and we will correct the error. Read these instructions fully before beginning the installation. If you are not confident in your ability to install a bumper and winch, which will be part of the installation process, please consult a professional before attempting. Contact Fly Offroad before you begin the installation if you have any questions or concerns. This product is RAW metal and should be painted, powder coated, or protected against the elements in some manner or rusting may occur.

APPLICATIONS

These installation instructions apply to the following Fly Offroad products:

1195-46102 Fly Offroad Winch Fairlead Bracket

PARTS LIST

Part	Qty
Fly Offroad Winch Fairlead Bracket.....	1

TOOLS NEEDED

- Standard socket and wrench set.

IMPORTANT INFORMATION

- This Fly Offroad Winch Fairlead Bracket is designed to be installed between an undamaged bumper that is not designed with an integrated fairlead mount and is compatible with most Hawse fairleads and roller fairleads. Installing on a damaged bumper or with a damaged winch is asking for vehicle damage, grave bodily harm, death, or extreme embarrassment as your fairlead, winch, or bumper falls off while in the middle of nowhere.

INSTALLATION PROCEDURE

- This Fly Offroad Winch Fairlead bracket is designed to perfectly mate with the **Fly Offroad JK Front Bumper, 0124-12101**, and **Fly Offroad Winch Fairlead, 1195-46101**.

- This winch fairlead bracket is designed to install between the winch and the bumper or winch plate. You may need longer bolts, not supplied, to secure the winch to the bumper or winch plate to compensate for the thickness of the Fly Offroad Winch Fairlead Bracket.
- This winch fairlead bracket is designed to fit most Warn winches and any winch with a 10" x 4-1/2" bolt pattern and most Warn or aftermarket roller or Hawse fairleads. Fly Offroad Fairlead, part 1195-46101, is recommended.
- This winch fairlead bracket has bolt holes on the bottom of the bracket that are slotted to allow for adjustment of the fairlead and mount. Some bumpers may require adjustment of the bracket forward or back in order to properly install the fairlead and avoid interference with existing shackle or shackle tabs.

Warn winch, rope, Fly Offroad Fairlead, and Factor 55 FlatLink sold separately.
